

Enjoy consistent quality and flavour
regardless of the season!

This is Greenhouse Goodness.

Efficient, reliable, nutritious vegetables

Greenhouses provide a consistent volume and quality of vegetables year-round that are a reliable, quality food source, grown in a controlled environment. In fact, Greenhouses grow 15 times more fresh produce per square metre than outdoor agriculture.

Closer to home

Having North America's fresh & nutritious Greenhouse vegetables close to home means they stay on their vines as long as possible. They are picked at their peak and shipped fresh to ensure consistent quality and flavour.

Research & Innovation

Our mission is to be recognized as global leaders in Greenhouse vegetable growing. We promote and connect our growers with consumers, retailers, and foodservice operators across North America to ensure success for today, sustainability for tomorrow, and fresh, nutritious produce for all!
